Participants

- Ellen Cull- Consultant

- Minneapolis Meeting: Liz Lee, Patrick Byrne, Jamie Sherman, Duke Pauli, Barry Tillman, David Francis, David Stelly, Shelly Jansky, Seth Murray, Allen Van Deynze, Shelby Ellison, Heather Merk, Donn Cummings, Don Jones, Wayne Smith, Eric Young, Ann Marie Thro, Phillip Simon, Bill Tracy, Mike Gore, Thomas Luebberstedt

- Distilling Group: Jamie Sherman, Donn Cummings, Mike Gore, David Francis, Barry Tillman
Purpose, goals, and intended products

The purpose of this planning process is to increase the ability of the NAPB and PBCC to work together to advance plant breeding in the US by developing a joint strategic plan.

The specific goals of the process are:

• Completion of a strategic plan that defines both 5-year and 10 to 15-year goals
• Identification of an action plan with initial steps for achieving the goals
• Further clarification of the roles of the NAPB and PBCC
• Identification of an appropriate model for NAPB
• Increased ability of NAPB and PBCC to think and manage strategically as an ongoing process
Purpose, goals, and intended products

**Intended products** of the planning process include:

- A strategic plan that outlines:
  - Missions and roles of both organizations
  - Shared vision and goals for 10 to 15 years
  - Five-year goals
  - Major initiatives / areas of focus to accomplish the goals in the next five years

- An action plan that outlines:
  - Initial steps to implement the goals in the subsequent one to two years
  - Clarification of lead responsibility for the actions
Purpose, goals, and intended products

The purpose of this planning process is to increase the ability of the NAPB and PBCC to work together to advance plant breeding in the US by developing a joint strategic plan.

The specific goals of the process are:

• Completion of a strategic plan that defines both 5-year and 10- to 15-year goals
• Identification of an action plan with initial steps for achieving the goals
• **Further clarification of the roles of the NAPB and PBCC**
• Identification of an appropriate model for NAPB
• Increased ability of NAPB and PBCC to think and manage strategically as an ongoing process

Joint strategic plan

NAPB strategic plan

Renewal of SSC-80
Clarified Mission and Vision

Our Mission

- The National Association of Plant Breeders strengthens plant breeding to promote food security, quality of life, and a sustainable future.

Our Vision

- The NAPB works to help create a future in which 1) **Strong public and private sectors** work independently and together to deliver varieties and improved germplasm to society, 2) The **value and importance of plant breeding** to food security, quality of life, and a sustainable future are **known and appreciated by the public**, and 3) Plant breeding is **viewed as dynamic, problem solving, and creative**. The NAPB intends to become a **recognized and valued advocate for plant breeding research and education**, helping to guide and implement a cohesive national plant breeding agenda.

Six objectives

## Six Goals of NAPB

1) **Support for plant breeding:**
   Increase support for plant breeding among decision makers in the public and private sectors

2) **Public plant breeding capacity:**
   Increase public and private support for cultivar development and germplasm improvement in public institutions

3) **Education of plant breeding professionals:**
   Strengthen education for plant breeding professionals at all levels of experience

4) **Public awareness:**
   Increase public awareness of plant breeding and what it contributes to the public good

5) **Membership:**
   Strengthen and increase value provided to the membership

6) **Organization:**
   Strengthen the NAPB organization
<table>
<thead>
<tr>
<th>Goal</th>
<th>Objectives - 5-year</th>
<th>Objectives-10 to 15-year</th>
<th>Possible Measures</th>
</tr>
</thead>
</table>
| **Support for plant breeding:** Increase support for plant breeding among decision makers in the public and private sectors | • Develop and implement process that enables NAPB leadership and individual members to 1) identify key concerns and issues, 2) determine whether to take action on them, 3) determine the action, and 4) identify members to take action.  
• Document the contribution of plant breeding to the public good in terms of the environment, climate change, food security, economic growth, and health that can be used to garner public support for plant breeding.  
• Initiate the development of a coherent national plan for plant breeding. | • Lead in the development of a coherent national plan for plant breeding.  
• Advocate for implementation of that national plan for plant breeding. | • Number of opinion or information papers produced  
• References to plant breeding in the Congressional Record  
• Number of federal legislators and executives attend NAPB meetings  
• Number of requests for NAPB input into policy and other decisions impacting plant breeding |
### Strategic Plan Goal 2

<table>
<thead>
<tr>
<th>Goal</th>
<th>Objectives - 5-year</th>
<th>Objectives-10 to 15-year</th>
<th>Possible Measures</th>
</tr>
</thead>
</table>
| **Public plant breeding capacity:** Increase public and private support for cultivar development and germplasm improvement in public institutions | • Identify and implement approaches for advocacy to governments, both NAPB advocating directly and supporting members in advocating.  
• Develop relationships with stakeholders to support plant breeding financially and through advocacy partnerships.  
• Create best management practices for public institutions regarding intellectual property protection and division of royalty returns to increase financial and institutional support of plant breeding.  
• Identify the conditions under which plant breeding programs thrive and develop best management practices. | • Expand advocacy to governments.  
• Expand relationships with stakeholders.  
• Create best management practices for public institutions on other topics. | • Number of public plant breeding positions  
• Number of public plant breeders given tenure based on plant breeding activity  
• Level of public funding of public plant breeding programs  
• Length of cycles of funding public plant breeding programs  
• Funding of national plant germplasm system  
• Amount of infrastructure for public plant breeding - land to do testing, support field technicians, and other support staff |
## Strategic Plan Goal 3

<table>
<thead>
<tr>
<th>Education of plant breeding professionals: Strengthen education for plant breeding professionals at all levels of experience</th>
<th>Objectives - 5-year</th>
<th>Objectives-10 to 15-year</th>
<th>Possible Measures</th>
</tr>
</thead>
</table>
| • Identify and disseminate best practices for plant breeding education to include experiential learning as well as improved curriculum with increased focus on graduating upper level students who are field-ready.  
• Explore and implement public-private collaborations to recruit and support training of plant breeders.  
  o Support for students - Expand public / private collaboration to provide support to plant breeding students for their training.  
  o Recruitment of students - Develop and begin implementing public-private partnership program for recruitment of students, which can be focused at the high school, college, or graduate levels.  
  o Life-long learning - Explore how to provide or support continuing education or certification. | • Implement methods to encourage consistent, strong university curricula, possibly including: aggregating information on existing curricula, sharing curricula, developing curriculum standards, recommending strong curricula, and / or providing checklists of courses and content.  
• Continue to expand collaborations to recruit and support training of plant breeders.  
• Implement approach to providing or supporting life-long learning empowering professionals to remain technically up-to-date. | • Number of plant breeding students who graduate with masters and Ph.D.s field-ready - they know how to work in the field, are able to do the field work of plant breeding  
• Amount of financial support available to graduate students  
• Student access to information leading to opportunities to enter plant breeding  
• Amount of private sector funding for education in the form of fellowships, cooperative training, and grants. |
## Strategic Plan Goal 4

<table>
<thead>
<tr>
<th>Goal</th>
<th>Objectives - 5-year</th>
<th>Objectives - 10 to 15-year</th>
<th>Possible Measures</th>
</tr>
</thead>
</table>
| **Public awareness:** Increase public awareness of plant breeding and what it contributes to the public good | • Increase frequency and quality of communications from NAPB to make more positive messages about plant breeding readily available for those seeking information by building on or enhancing existing efforts.  
  o Enhance the web site and make it a top search hit for plant breeding.  
  o Improve responses to media interest.  
  o Enhance use of social media.  
  o Get more plant breeding success stories in the media.  
  • Investigate ways to implement a public awareness effort or campaign. | • Implement a public awareness effort or campaign. Investigate the feasibility of hiring a consulting firm and doing baseline polling. | • Web site hits  
• Measures of effectiveness of social media  
• Number of plant breeding success stories in the media  
• Degree of public awareness of plant breeding  
• Number of pieces about plant breeding in the media and assessment of the perception of plant breeding |
## Strategic Plan Goal 5

<table>
<thead>
<tr>
<th>Membership: Strengthen and increase value provided to the membership</th>
<th>Objectives - 5-year</th>
<th>Objectives - 10 to 15-year</th>
<th>Possible Measures</th>
</tr>
