

WASHINGTON STATE UNIVERSITY

**College of Agricultural, Human,  
and Natural Resource Sciences**

### Applications must include

- A brief (2 page maximum) research statement addressing your research focus and experience in plant breeding/cultivar development.
- A current curriculum vitae.
- A statement on diversity, equity, and inclusion (DEI) that addresses your DEI values and philosophy, examples of how you have engaged in DEI, and how you anticipate engaging in DEI if offered the position (1 page maximum).
- Electronic copies of graduate program academic transcript.
- Names and contact information for four professional references. Reference letters will be requested for the finalists.

Contact Dr. Lisa Wasko DeVetter, Search Committee Chair ([lisa.devetter@wsu.edu](mailto:lisa.devetter@wsu.edu), 360-848-6124) for questions. All qualified individuals are encouraged to apply. Screening of application materials begins **JANUARY 15, 2024**, and the position will remain open until filled. Visit <https://hrs.wsu.edu/jobs/> to apply.

Apply on **Workday** (R-10792)

### DEPARTMENT OF HORTICULTURE

## Endowed Chair in Raspberry Breeding

**T**he Department of Horticulture within the College of Agricultural, Human, and Natural Resource Sciences (CAHNRS) at Washington State University (WSU) is recruiting an **ENDOWED CHAIR IN RASPBERRY BREEDING** to join an extraordinary team of scientists and extension experts at Washington State University. The position is supported by a \$1.5 million investment by the Washington Red Raspberry Commission. Washington leads the nation in processed red raspberry production with this high quality, machine-harvested crop transformed into high-value products including individually quick frozen whole fruits and crumbles, purees, and juice.

The position is permanent 12-month tenure track, and will be hired at the Assistant, Associate, or Professor level commensurate with the level of experience of the successful candidate. The position will be based at the WSU Mount Vernon Northwestern Washington Research and Extension Center (WSU NWREC) with additional resources in the Lynden area of Whatcom County and Puyallup Research and Extension Center. Washington State University has strong expertise in the areas of small fruit horticulture, genomics of Rosaceae fruit crops, arthropod pest and disease management, and extension. The raspberry breeder will join this strong, collaborative team that serves the Pacific Northwest region. Furthermore, the region has a strong and collaborative network of public and private small fruit crop breeders in Oregon, Washington, and British Columbia, Canada. The successful candidate will be expected to engage with these collaborative programs to further enhance their statewide, national, and international impact.

**LIFE IN MOUNT VERNON AND NORTHWESTERN WASHINGTON.** The successful candidate will be housed at the WSU NWREC located in Mount Vernon, Washington. The region is characterized by a mild marine climate, diverse farming enterprises that include annual and perennial production systems, and close rural-urban interactions. Western Washington is well known for its scenic beauty that includes beautiful farming operations nestled between the Cascade Mountain Range and Puget Sound. The region is also noted for its food culture, which includes local, sustainable, and organic production and processing systems with a focus on value-added enterprises. Major cities and their attractions—including Seattle and Vancouver, Canada—are accessible via a two to three hour drive.

# Expected Goals & Contributions

## RESEARCH RESPONSIBILITIES.

The incumbent will lead a nationally recognized and regionally relevant program focused on raspberry breeding and cultivar release to enhance crop productivity and profitability. Washington State University has a successful history in raspberry breeding dating back to 1929 with important contributions in machine harvestability, *Phytophthora* root rot tolerance, and *Raspberry bush dwarf virus* (RBDV) resistance. Opportunities may also arise to expand the program to include other commercially important and/or alternative small fruit crops, but the primary focus shall be on raspberry. The endowment is funded by the Washington Red Raspberry Commission and the successful incumbent will work in partnership with grower-stakeholders in Whatcom County and an endowment advisory committee to enhance the red raspberry program success and impact.

## OUTREACH AND TEACHING RESPONSIBILITIES.

The incumbent's program is expected to also engage in discipline-appropriate outreach and teaching. The individual will contribute to undergraduate or graduate education in the Department of Horticulture. Teaching will be expected after three years in the position with the expectation to teach three credits every year. Mentorship of graduate students is expected within the first year in the position, as this is a critical component of workforce development and addressing the needs of the region. Excellence in mentorship and maintaining standards of diversity, equity, and inclusion in the recruitment of students and staff are expected.

## REQUIRED QUALIFICATIONS.

- A PhD degree in plant breeding or a closely related field.
- Demonstrated record of scholarly accomplishments in research, extension, and/or teaching commensurate with career level within the field of plant breeding (or a closely related field).
- Qualifications for appointment at the Assistant Professor rank must have experience in an assistant-rank position or equivalent with an established record of accomplishments in program leadership, scholarship, and extramural funding.
- Qualifications for appointment at the Associate Professor or Professor rank must meet criteria outlined in the WSU Faculty Manual (<https://provost.wsu.edu/manuals-and-forms/>).

## PREFERRED QUALIFICATIONS.

- Demonstrated experience in perennial fruit crop breeding and development/release of new cultivars.
- Demonstrated ability to conduct original research.
- Demonstrated ability to communicate (oral, written, and electronic) effectively with technical and nontechnical audiences.
- Demonstrated record of or capacity to acquire and/or manage extramural competitive grant support.
- Ability or capacity to teach/mentor undergraduate and graduate students.
- Ability to work effectively with interdisciplinary teams and stakeholders.
